## **Vision & Missions statement**

Making a difference and achieving excellence for every child.

# **School values**

- Growth We go beyond what is expected to continually improve standards and deliver ambitious outcomes.
- Respect We do the right thing for our children.
- Inclusion We care about people as individuals.

You can find out more about school on our website: <a href="https://www.chapelstreetprimary.co.uk/">https://www.chapelstreetprimary.co.uk/</a>

If you have any questions about the content of this policy:

- If you are a member of staff speak with your line manager or a member of the leadership team
- If you are a parent / carer contact the school office on 0161 224 1269
- If you are another interested party contact the school office on 0161 224 1269

### Justification.

At Chapel Street, geography will inspire in pupils a lifelong curiosity and fascination about the world and its people. We will encourage them to develop respect and concern for all people, including those whose heritage, culture or religion is different from their own. As pupils progress, children will increase and deepen their understanding of geographical features and discover the impact of human and physical activities upon the planet. We will help children to reflect upon their own impact on the earth and encourage them to develop an interest in taking care of the world and its resources. The curriculum that we offer meets the needs of the diverse community within the school and allows children to understand that even though we are from different communities we are all still equal.

### Intent

- 1. To stimulate children's interest and to help foster a sense of wonder in the world around them including the physical and social conditions in different parts of the world.
- 2. To help pupils acquire a wide range of geographical knowledge and skills to enable them to understand the relationship between Earth and its people.
- 3. To help pupils understand that the character of places derives from the interaction of people and environment, by increasing their knowledge about the location of the physical and human features of the Earth and the processes, systems and interrelations that create and influence them.
- 4. To develop pupils' knowledge of the location of different places including their physical and human characteristics and how these provide context for understanding their geography.
- 5. To develop an appreciation of the how and why human actions change the environment locally, nationally and globally.
- 6. To enable children to understand how the Earth's features are shaped, the processes that give rise to key physical and human features of the world and how they change over time.
- 7. To develop concern, respect and a sense of responsibility towards the global community and how we can contribute to be an inclusive community.
- 8. To develop the geographical skills needed to collect and analyse information gathered through first hand experiences of the environment and to carry out geographical enquiries.
- 7. To enable pupils to interpret a range of sources of geographical information, including maps, diagrams, globes, aerial photographs and communicate geographical information in a variety of ways, including through maps, numerical and quantitative skills and recording.
- 8. To use geography to develop pupils' thinking skills, skills in literacy, numeracy and ICT and to promote pupils' awareness and understanding of gender, cultural, spiritual and moral issues.

## Implementation

- 1. Geography in this school will be underpinned by the study of real places and discovering how the people living there are influenced by and affect the environment of those places.
- 2. We will develop pupils' knowledge and geographical understanding by first immersing them in the area where they live and then by gradually widening their horizons and increasing their awareness of their town, their region, their nation, other lands and continents.

- 3. Teaching and learning will use exciting first-hand experiences, imaginative resources and ICT to build pupils' with knowledge about different places, peoples, resources and natural and human environments, together with a deep understanding of the Earth's key physical and human processes.
- 4. We use the National Curriculum as the basis for our planning in Geography. The NC programme of study will be adapted to suit our local context and make them relevant for the children. The scheme of work is designed so that pupils are increasingly challenged as they move through the school.
- 5. In this school fieldwork and first-hand experience will be fundamental to the teaching and learning of geography and where appropriate, all pupils will be given the opportunity to go out into the local and wider environment to research and discover the world in which they live.
- 6. Research projects in geography will be linked to other core and foundation subjects, particularly history, RE, art and science and meaningful connections will be made as pupils increase their knowledge, skills and understanding of the world.
- 7. Children will study climate issues across the world through the use of secondary sources including maps, videos, photographs, school links, visiting speakers and relevant topical news items.

### **Impact**

Geography will be fun and it will inspire in pupils a curiosity and fascination about the world and its people that will remain with them for the rest of their lives. It will increase their knowledge and understanding of the world and it will be used to promote excellence and enjoyment. It will be linked with other subjects and it will have a strong presence in the ethos of the school through art, displays, performances, music, drama and assemblies. We will make the world our classroom to enrich the lives of our pupils.

### **Cross Curricular Links.**

The school will teach geography through a 'thematic' approach identifying topics which appeal to children and but also create conversation about the diverse world we live in and facilitate the integration of up to three curriculum areas. We will identify opportunities to develop our geographical knowledge during our Literacy lessons by using specific vocabulary and resources such as topical books. Mathematical skills will be developed through their accurate application during specific geographical tasks. Opportunities to use ICT in ways that will enhance children's learning in geography are indicated in several themes and links will also be made between geographical skills and those in other curriculum areas where appropriate.

## Planning.

The school has adopted a thematic approach to planning and delivering. Learning objectives are taken from the National Curriculum Programmes of Study for geography. The Long Term Planning Framework is fixed as are the Medium Term Plans within it. These give detailed information about what should be taught in each topic and which National Curriculum objectives this covers. Individual teachers develop Short Term for use in their year group.

## Recording & Assessment.

Assessment of the quality of children's work and rate of progress will be through teachers' careful observations and marking of children's output. The Subject Coordinators will assess the quality of children's work and judge it against Medium Term objectives to ensure delivery, high standards and progression. Formative assessments, carried out against the National Curriculum Attainment Targets are carried out whilst the theme is being delivered. Children in the Foundation will be assessed against the 'EYFS Ages & Stages and Foundation Stage Profile' criteria. Assessments will be on-going throughout the year in this phase.

#### Resources.

General resources such as atlases and books are stored in the Geography Resource Cupboard outside the gym hall. Each class will display a World map suitable to the year group on the wall at the children's eye level. Resources will be updated through annual audits and at teachers requests after units have been taught.

## **Professional Development.**

It is important to recognise any particular difficulties staff may have in delivering the curriculum and an annual review will determine any co-ordinator input or INSET which may be required.

## **SEN and Equal Opportunity.**

Our school will aim to provide for children with Special Educational Needs at both ends of the spectrum with a curriculum that is inclusive and which meets the needs of all children through differentiated activities. Activities during lessons will be differentiated to meet the needs of the particular children in the class and differentiations will be indicated on teacher's plans. We will ensure children from all gender, race and ability groups are included and motivated through a range of teaching styles and experiences.

## Children with English as a Second Language.

We will try to ensure that children who have English as a second language have adult / peer support in class to enable them to gain the knowledge, understanding and skills set out in the Programmes of Study. International New Arrivals will be supported by an LSA where possible.

#### Review.

This document will be reviewed annually by the Subject Coordinators.
